

Logistics Analyst 1

Job summary

The [Logistics Analyst](https://100hires.com/logistics-analyst-job-description.html) will be responsible for the collection, review and financial analysis of logistics data and dedicated carrier proposals to support decision making. Assists in maximizing supply chain efficiency through the effective modeling and design of inbound transportation routes. The role will perform complex calculations for inbound conversions to measure net income per engineered route and summarize weekly pipeline potential and activated inbound route status.

The ideal candidate will be self-motivated with strong analytical skills and a passion for developing a career in supply chain or general management.

Responsibilities

Support development and performance of inbound logistics through daily data analysis of relevant freight and vendor data – measuring and reporting on inbound route performance related to freight goal attainment - provide profitable net income and service recommendations to supply chain stakeholders for fleet, 3rd party and dedicated carrier freight conversions.

Support inbound logistics processes such as the modeling of complex financial calculations based on inbound route design

Support the development and maintenance of the logistics databases within the logistics department.

Utilize financial, logistical, and procurement databases/systems to assist in freight reporting and ad hoc route analysis to support corrective action improvements and/or re-engineered route solutions.

Perform detailed analysis and provide KPIs/metrics to department leadership and executive supply chain stakeholders as needed

Support partnering / consensus building across Logistics functions and with other internal / external stakeholders including the field

Requirements

Bachelor's degree required

Strong proficiency with Microsoft Office required (i.e. Excel, PowerPoint, Word, and Access)

Strong aptitude for assessing large datasets and deriving key performance-related insights

Effective communication teaming skills; capable of developing alignment across Logistics functions and other departments

Capable of utilizing data warehouse tools and extracts

Undergraduate major in supply chain, operations, statistics, business, or a data-related field

Prior work or internship experience in supply chain or data analytics

Logistics Analyst 2

Job summary

As an innovation leader, we look for ambitious, forward thinking, open-minded and well-rounded individuals to join our global team. Located in our office, you will be a key member of Transportation team.

As a Logistics Analyst, you will be working with cross functional and global partners to optimize logistics program and drive continuous improvements. Your objective will be to define, create, and manage logistics KPI's and to ensure sites and/or service providers report metrics according to set standards indicating strong logistics program performance.

Responsibilities

Developing standardized reporting and metrics to measure global logistics KPI's

Performing data quality analysis and managing follow-up resolution with service providers to ensure reporting accuracy

Researching root cause and driving corrective action to improve logistics performance and achieve business objectives

Closely partnering with global stakeholders to ensure expected lead times and logistics service levels are met

Using data to identify and highlight issues and opportunities to optimize logistics processes and costs.

Requirements

3 years of progressive experience in global logistics or supply chain preferred

Bachelor's degree in a related or analytical field preferred

Strong Excel and Access skills

Continuous improvement mindset

Diligent attention to detail

Ability to identify, understand, and solve complex problems by leveraging analytical skills

Excellent time management skills

Ability to work effectively within a global environment

Ability to effectively communicate with internal and external contacts at all levels

Must be legally authorized to work in the United States without company sponsorship.
